Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

1. INTRODUCTION

The following discussion and analysis are management's assessment of the results of operation and financial condition of Water Ways Technologies Inc. ("**Water Ways Technologies**", "**Water Ways**", "**WWT**", or the "**Company**") and its subsidiaries (individually and collectively as the context requires) and constitutes management's review of the factors that affected the Company's financial and operating performance for the three and six months period ended June 30, 2021.

The following information should be read in conjunction with the Company's unaudited condensed consolidated interim financial statements for the three and six months period ended June 30, 2021, together with the notes thereto, as well as the audited consolidated financial statements for the year ended December 31, 2020 and the notes thereto.

The date of this management's discussion and analysis ("**MD&A**") is August 29, 2021. The Company's financial statements and therefore the comparative amounts in this MD&A have been prepared in accordance with International Financial Reporting Standards ("**IFRS**") issued by the International Accounting Standards Board. References to "\$", "USD" or "US\$" refer to United States dollars unless otherwise indicated. References to "CAD\$" or "CDN\$" dollars refer to Canadian dollars. References to "NIS" refer to New Israeli Shekels. All the amounts in the report, regardless of currency are referenced in thousands (other than amounts relating to the exercise price of securities or other per share amounts).

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This MD&A contains "forward-looking information" within the meaning of applicable Canadian securities legislation ("**forward-looking information**"). Such forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Water Ways Technologies to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statements were made, and readers are advised to consider such forward-looking statements in light of the risks set forth below and as detailed under "*Risks and Uncertainties*" in this MD&A.

Although Water Ways Technologies has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. Forward-looking information contained herein is given as of the date of this MD&A and Water Ways Technologies disclaims any obligation to update any forward-looking information, whether as a result of new information, future events or results, except as may be required by applicable securities laws. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information.

Overview of Operations

Water Ways Technologies is an agriculture technology company that specializes in providing water irrigation and agriculture solutions to agricultural producers. Water Ways Technologies competes in the global irrigation water systems market with a focus on developing solutions with commercial applications in the micro and precision irrigation segments of the overall market.

There are several methods of irrigation and they vary in how water is supplied to the plants with the goal being uniform application of water to all plants such that each plant precisely gets the amount of water it needs. Surface irrigation is the oldest form of irrigation and has been in use for thousands of years. In surface (furrow, flood or level basin) irrigation systems, water moves across the surface of agricultural lands, in order to infiltrate the soil and hydrate plants. It is often called flood irrigation when the irrigation results in flooding or near flooding of the cultivated land. Historically, this has been the most common method of irrigating agricultural land and is still used in many parts of the world. However, by its nature, it is excessive in its consumption of water.

The system collects real-time data from sensors installed in the field, allowing the client to analyze the data and control the system. The system is currently on trial in several projects in Serbia, Israel and Mexico.

Water Ways Technologies has also implemented many turn-key agricultural and aqua-cultural projects with innovative irrigation and water systems in Canada, Israel, China, South Africa, Mexico, Peru, Colombia, Ethiopia, Uzbekistan and more.

Water Ways Technologies' main revenue streams are derived from the following business units:

- i) Project Services Business Unit; and
- ii) Products - Component and Equipment Sales Unit.

2. DESCRIPTION OF BUSINESS (CONT.)

Overview of Operations (cont.)

As part of Water Ways mission to expand its business plan into the global legal medical cannabis sector, usually grown in indoor facilities, the Company has launched its Internet of Things ("IOT") controlled irrigation and fertilization system for cannabis cultivators and growers. Developed in Israel by the Company's Research & Development team, the system is one of the first in the world designed for the specific needs of cannabis growers and cultivators. Cannabis cultivation site-tested and market ready, the system allows for higher yields and consistency for cannabis growing while reducing energy, water and fertilization costs. The system can be implemented in other type of indoor growing facilities, for high quality growing, like berries and others.

Significant Developments During the Period

1. The 2019 Novel Coronavirus infection ("**Coronavirus**", "**Covid-19**" or the "**Event**") pandemic poses a major public health threat. It has hindered the movement of people and goods worldwide, and many governments are instituting restrictions on both individuals and businesses. The resulting impact on financial reporting will be significant. Significant development and spread of the coronavirus did not take place until January 2020, with the World Health Organization (WHO) announcing the coronavirus as a global health emergency on January 30, 2020, which prompted national governments around the world to begin putting actions in place to slow the spread of Covid-19. Furthermore, significant measures taken by the Chinese government and by private sector organizations did not take place until early 2020. On March 11, 2020, the WHO declared Covid-19 a global pandemic and suggested worldwide containment and mitigation measures. In response to the pandemic, the Company has adjusted its business practices with a focus on the health and well-being of our employees and their families, customers, partners, service providers, and communities. Certain of the Company's offices have been subject to government-mandated lockdowns for some periods of time. However, the Company's teams have been able to perform their functions remotely without meaningful reductions in the Company's ability to service its customers.

The following are the effects of the Coronavirus on the Company as of June 30, 2021:

- Heartnut Grove WWT Inc. - The Company's Canadian business operating through HGWWT has not been impacted by the Coronavirus.
- IRRI-AL TAL (Shanghai) Agriculture Technology Company Ltd. - the Company's Chinese subsidiary had significant decline in its business in China during 2020. In early March 2020 with an easing of local Coronavirus restrictions, the Company was able to re-commence operations although on a smaller scale than planned. As of June 30, 2021, IRRI-AL TAL (Shanghai) signed and delivered several projects amounting \$880 and finalized agreements for additional projects on the amount of \$170.
- Irri-Al-Tal Ltd. - The Company's Israeli subsidiary regain to full operations with revenue increased significantly. As of June 30, 2021, Irri-Al-Tal has not experienced any cancellations of existing orders or agreements but has experienced many delays in orders from vendors. As a result, customer orders were delayed as well. The global impact of the COVID-19 affected the manufacturing capacity of the suppliers which has been reduced and, therefore, the Company's ability to deliver products and projects in accordance with

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

agreed schedules. Furthermore, the cost of shipment has been increased due to the airlines reducing the amount of international flights and, therefore, shipment times were increased.

The Company hopes that the Crisis will create demand in certain countries for self-sustaining food supplies in times of world crisis. The Company hopes that there will be a growing demand for smart irrigation solutions in countries that are aware of the risk of shortage in food supplies that will seek to grow more crops domestically.

Financial events

2. On March 11, 2021, the Company announced that prior to the expiry of its repriced Warrants it received instructions to exercise a total of 10,036,458 Warrants (equaling 89% of all outstanding Warrants) resulting in the issuance of an equal number of common shares and aggregate proceeds to the Company of \$480.
3. On June 30, 2021, the Company announced the escrow closing of the first tranche (the "**First Tranche**") of a private placement (the "**Offering**") of up to 33,333,333 units (the "**PP Units**") at a price of CAD\$0.12 per PP Unit, for gross proceeds of up to \$3,200 (equivalent to CAD\$4,000) (the "**Gross Proceeds**"). The First Tranche escrow closing resulted the issuance of 27,016,666 PP Units. Each PP Unit is composed of one common share of the Company and one common share purchase warrant (the "**PP Warrant**"). Each PP Warrant entitles the holder thereof to acquire one additional common share of the Company (each a "**PP Warrant Share**"), upon payment to the Company of CAD\$0.18 per PP Warrant Share until June 30, 2024, however, that if, following July 1, 2022, the volume weighted average price of the Common Shares of the Company for any 10 consecutive trading days equals or exceeds \$0.24, the Company may, upon providing written notice to the holders of the PP Warrants, accelerate the expiry date of the PP Warrants to the date that is 30 days following the date of such written notice.

The Company expects to pay finder's fees in association with the Offering, payable in cash, of up to 8% of the Gross Proceeds, and will issue that number of Finder Warrants as is equal to 8% of the Units sold ("**Finder Warrants**"). Each Finder Warrant will be exercisable into a Unit upon payment by the holder thereof of CAD\$0.12 per PP Unit. In connection with the First Tranche closing, the company issued 2,161,333 Finder Warrants and pay a cash commission of \$210 (equivalent to CAD\$259).

Operational events

4. On January 19, 2021, the Company announced the signing, effective January 13, 2021, of a large scale irrigation project in Uzbekistan. The value of the project (aggregate revenue to the Company) is \$1,050. Water Ways recognized revenue from the project in the first six months of 2021.
5. On January 28, 2021, the Company announced that it received the fourth commercial order in Israel since December 2019, for its Medical Cannabis IOT Irrigation and fertilization systems. The Company delivered and installed the system in the first half of 2021 and recognized revenue from the project in the first six months of 2021.

For the Three and Six Months Period Ended June 30, 2021

Significant Developments During the Period (cont.)

6. On February 16, 2021, the Company announced the signing, effective January 28, 2021, of a contract for a large cotton irrigation project in Uzbekistan. The value of the project is approximately \$3,200 and was completed in the second quarter of 2021. As of June 30, 2021, the company recognized revenue totaling \$2,858.
7. On February 24, 2021, the Company announced that its Canadian subsidiary, Heartnut Grove WWT Inc., signed its first contract to design and construct a complete irrigation project. The project, with an expected revenue of \$280 was delivered and installed in the second quarter of 2021. Project was increased to \$360 during the period. As of June 30, 2021, the company recognized revenue totaling \$366.
8. On March 18, 2021, the Company announced that it had signed an agreement to deliver a strawberry irrigation project in Ethiopia with a value of \$260 subject to receipt from the client of an irrevocable letter of credit. As of June 30, 2021, the company recognized revenue totaling \$100.
9. On March 25, 2021, the Company announced that its Chinese subsidiary, IRRI-ALTAL (Shanghai) Agriculture Technology Company Limited, has received orders for two projects with a value exceeding \$600 to be delivered in the second and third quarters of 2021.
10. On April 26, 2021, the Company announced that the \$260 strawberry irrigation project in Ethiopia (previously announced on March 18, 2021) has expanded to a value of approximately \$376.
11. On May 6, 2021, the Company announced that it received a \$105 new order for upgrading an existing Cannabis irrigation system to one of the largest Medical Cannabis licensed producers in Israel.
12. On May 20, 2021, the Company announced that its Chinese subsidiary, IRRI-ALTAL (Shanghai) Agriculture Technology Company Limited, has received orders for two projects with a value exceeding \$150 to be delivered in the second and third quarters of 2021.
13. On June 1, 2021, the Company announced that it received the fifth commercial order for its Medical Cannabis Internet of Things water and control system. The \$255 order was received from an Israeli Licensed Producer who is currently building a 7,000 Square meters (approximately 75,000 Sq/ft) Medical Cannabis Cultivation facility in of Israel. The Company expects to deliver and install the system by the end of 2021.
14. On June 24, 2021, the Company announced that its Canadian subsidiary, Heartnut Grove WWT Inc. has entered into a distribution agreement with Amiad Water Systems Ltd. ("Amiad") (LON:AFS), a leading global producer of automatic, self-cleaning water treatment and filtration products and systems, to distribute water filtration systems in Canada. Under the terms of the agreement, Heartnut Grove WWT Inc. will become an official distributor of Amiad's filtration systems in Canada.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

Subsequent Events

1. On July 27, 2021, the Company announced that it has, in connection with its previously announced Financing, closed an additional \$975 (equivalent to CAD\$1,200) (the "**Second Tranche Gross Proceeds**") into escrow (the "**Second Tranche Closing**"). The Second Tranche Gross Proceeds are in addition to the \$2,634 (equivalent to CAD\$3,240) closed and previously disclosed. The Second Tranche Gross Proceeds represent subscriptions for an additional 10,022,850 Units at a price of CAD\$0.12 per Unit. The Second Tranche Closing will result in an increase to the aggregate total amount of Units sold pursuant to the Financing of 37,039,516 Units.
2. August 8, 2021, the Company announced that it has oversubscribed private placement escrow closings, fulfilled all escrow conditions for both tranches, resulting in the release from escrow to the Company, of an aggregate amount of \$3,614 (equivalent to CAD\$4,445) (the "**Aggregate Gross Proceeds**"). In connection with the Financing the Company issued: (i) an aggregate cash payment of \$252 (equivalent to CAD\$310), an amount equal to 7% of the Aggregate Gross Proceeds; and (ii) issued 3,388,801 Finder Warrants, an amount equal to 9% of the Units sold pursuant to the Financing. Each Finder Warrant will be exercisable into one Unit upon payment by the holder thereof of CAD\$0.12 per Unit, until June 30, 2024, in respect of 2,161,333 Finders Warrants, and August 3, 2024, in respect of 1,227,468 Finder Warrants.
3. On August, 2021, The Company announces that it had granted 1,560,000 stock options ("**Participant Options**") to directors and employees pursuant to the terms of the Company's stock option plan. Of this amount, 700,000 Participant Options were granted to directors and shall vest immediately. The remaining 860,000 Participant Options were granted to employees and shall also vest immediately. All Participant Options shall have an exercise price of CAD\$0.195 and shall expire 5 years after their grant. In Addition, the Company granted 3,040,000 Restricted Share Units ("**Participant RSU**") to directors and employees pursuant to the terms of the Company's RSU plan. Of this amount, 1,950,000 Participant RSUs were granted to directors. The remaining 1,090,000 Participant RSUs were granted to employees.

Major customers, defined as those customers responsible for over 9% of the Company's revenues, were as follows:

	For the six months period ended June 30	
	2021	2020
Customer A	25%	13%
Customer B	11%	12%
Customer C	9%	9%

Six months period ended June 30, 2021, compared to six months period ended June 30, 2020

Revenues

For the six months period ended June 30, 2021, total revenues amounted to \$9,711 compared to \$5,111 for six months period ended June 30, 2020. The increase in revenues was mainly attributed to emerging markets effect following the Coronavirus impact. In most territories in which the Company operates, the Coronavirus restrictions on civilian movement, transit, and closed borders were lifted and enabled the Company finalize projects and receive new orders.

The revenues from service projects for the six months period ended June 30, 2021, amounted to \$5,130 compared to \$1,413 for the six months period ended June 30, 2020. The increase is mainly attributed to the Company's two major projects in Uzbekistan with total amount of \$4,000. Irrigation projects are seasonal, and the completion may stretch over a period which last over a year. As a result, revenues on these long-term fixed-price contracts are recognized using the percentage-of-completion method. As of June 30, 2021, the Company operates in substantial irrigation projects in China, Israel, Uzbekistan and Africa. In addition, IAT Shanghai began operating regularly after restrictions of Covid-19 in China and contributes \$880 to the project revenue stream.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

2. DESCRIPTION OF BUSINESS (CONT.)

Financial Review (cont.)

The revenues from sales of products for the six months period ended June 30, 2021, amounted to \$4,581 compared to \$3,698 for the six months period ended June 30, 2020. The increase in product revenues is mainly due to the growth in product sales of HGWWT.

Cost of revenue

For the six months period ended June 30, 2021, cost of revenues amounted to \$7,803 compared to \$4,238 for the six months period ended June 30, 2020. The increase was due to the associated increase in revenue from projects and products over the period.

Cost of revenues in service projects increased to \$4,061 for the six months period ended June 30, 2021, from \$1,150 for the six months period ended June 30, 2020. The increase was due to the associated increase in revenues of service projects over the period, mainly in Uzbekistan.

Cost of revenues in sales of products increased to \$3,742 for the six months period ended June 30, 2021, from \$3,088 for the six months period ended June 30, 2020. The increase was due to the associated growth in revenues from products over the period.

Gross Profit

For the six months period ended June 30, 2021, gross profit amounted to \$1,908 compared to \$873 for the six months period ended June 30, 2021.

Gross profit in service projects increased to \$1,069 for the six months period ended June 30, 2021, from \$263 for the six months period ended June 30, 2020. The increase is attributed mainly to the increase in revenues.

Gross profit in sales of products increased to \$839 for the six months period ended June 30, 2021, from \$601 for the six months period ended June 30, 2020. The increase is mainly due to sales of products with higher profit margins in the Company's subsidiary, HGWWT, which sells not only irrigation products but also horticulture, agriculture and mulch products to Canada, North Africa and the United States.

Selling, general and administrative and marketing expenses

For the six months period ended June 30, 2021, selling, general and administrative and marketing expenses amounted to \$1,355 compared to \$997 for the six months period ended June 30, 2020.

The increase in selling, general and administrative and marketing expenses in the six months period ended June 30, 2021, was mainly attributed to the operations of the Company's operational subsidiaries in Canada and in China. IRRI-AL TAL (Shanghai) was established at the end of March 2020; therefore, its expenses did not affect significantly on the consolidated expenses in 2020 compared to 2021. In addition, HGWWT demonstrates growth in revenues and additional staff is mandatory in order to support its operations. In addition, the Company recognized expenses relating to commissions to its marketing employees for 2020 sales.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

2. **DESCRIPTION OF BUSINESS (CONT.)**

Financial Review (cont.)

Finance expenses

For the six months period ended June 30, 2021, finance expenses amounted to \$392 as compared to \$99 for the six months period ended June 30, 2020. The increase is mainly attributed to the change in fair value through profit and loss of the company's exercised Warrants (see note 4 in the unaudited condensed consolidated interim financial statements) amounted to \$145 and due to the private placement listing expenses, which were classified as finance expenses amounted to \$101. The remaining amount is due to bank fees and loan financing expenses.

Three months period ended June 30, 2021, compared to three months period ended June 30, 2020

Revenues

For the three months period ended June 30, 2021, total revenues amounted to \$5,408 compared to \$2,726 for three months period ended June 30, 2020. The increase in revenues was mainly attributed to emerging markets effect following the Coronavirus impact. In most territories in which the Company operates, the Coronavirus restrictions on civilian movement, transit, and closed borders were lifted and enabled the Company finalize projects and receive new orders.

The revenues from service projects for the three months period ended June 30, 2021, amounted to \$2,590 compared to \$574 for the three months period ended June 30, 2020. The increase is mainly attributed to the Company's two major projects in Uzbekistan with total amount of \$4,000 and revenue recognition of \$3,400. Irrigation projects are seasonal, and the completion may stretch over a period which last over a year. As a result, revenues on these long-term fixed-price contracts are recognized using the percentage-of-completion method. As of June 30, 2021, the Company operates in substantial irrigation projects in China, Israel, Uzbekistan and Africa. In addition, IAT Shanghai began operating regularly after restrictions of Covid-19 in China and contributes \$623 to the project revenue stream.

The revenues from sales of products for the three months period ended June 30, 2021, amounted to \$2,818 compared to \$2,152 for the three months period ended June 30, 2020. The increase in product revenues is mainly due to the product sales of HGWWT.

Cost of revenue

For the three months period ended June 30, 2021, cost of revenues amounted to \$4,472 compared to \$2,302 for the three months period ended June 30, 2020. The increase was due to the associated increase in revenue from projects and products over the period.

Cost of revenues in service projects increased to \$2,115 for the three months period ended June 30, 2021, from \$483 for the three months period ended June 30, 2020. The increase was due to the associated increase in revenues of service projects over the period, mainly in Uzbekistan.

Cost of revenues in sales of products increased to \$2,357 for the three months period ended June 30, 2021, from \$1,819 for the three months period ended June 30, 2020. The increase was due to the associated growth in revenues from products over the period.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

2. DESCRIPTION OF BUSINESS (CONT.)

Financial Review (cont.)

Gross Profit

For the three months period ended June 30, 2021, gross profit amounted to \$936 compared to \$424 for the three months period ended June 30, 2020. The increase is mainly associated with the portion of revenue from projects which usually has a higher gross margin compared to revenue from products.

Gross profit in service projects increased to \$475 for the three months period ended June 30, 2021, from \$91 for the three months period ended June 30, 2020. The increase is attributed mainly to the increase in revenues.

Gross profit in sales of products increased to \$461 for the three months period ended June 30, 2021, from \$333 for the three months period ended June 30, 2020. The increase is mainly due to sales of products with higher profit margins in the Company's subsidiary, HGWWT.

Selling, general and administrative and marketing expenses

For the three months period ended June 30, 2021, selling, general and administrative and marketing expenses amounted to \$773 compared to \$554 for the three months period ended June 30, 2020.

The increase in selling, general and administrative and marketing expenses in the three months period ended 2021 was mainly attributed to the operations of the Company's operational subsidiaries in Canada and in China. HGWWT demonstrates growth in revenues and additional staff is mandatory in order to support its operations. Also, the Company recognized expenses relating to commissions to its marketing employees for 2020 sales. In IAT, due to the Covid-19, employees worked part time during in the second quarter of 2020 as they received grants from the state of Israel replacing their full salaries. In addition, employees agreed to a temporary reduction in their wages, which was paid back during 2021.

Financial expenses

For the three month period ended June 30, 2021, finance expenses amounted to \$202 as compared to \$45 for the period ended June 30, 2020. The increase is mainly attributed to the change in fair value through profit and loss of the company's private placement listing expenses, which were classified as finance expenses amounted to \$101. The remaining amount is due to bank fees and loan financing expenses.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

3. LIQUIDITY AND CAPITAL RESOURCES

The consolidated financial statements to which this MD&A relates have been prepared on a going concern basis whereby Water Ways Technologies is assumed to be able to realize its assets and discharge its liabilities in the normal course of operations. The financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern assumption was not appropriate for the Company's financial statements, then adjustments of a material nature would be necessary in the carrying value of assets.

As of June 30, 2021, Water Ways Technologies had working capital of \$3,552 compared with \$12 for the year ended December 31, 2020. The working capital consists of current assets of cash and cash equivalents, short term deposits, accounts receivables, other receivables, inventory, current liabilities of accounts payable and accrued liabilities and the short-term portion of long term loans. The main reason for the significant increase is the Warrant exercise in respect of the Qualifying Transaction and the Company's Private Placement and the completion of its first tranche.

Water Ways Technologies expects to generate a sufficient amount of cash and cash equivalents from operations to maintain the Company's current capacity to generate cash flow and be able to achieve modest financial targets through organic growth. In order to assist with meeting short-term financial needs to fund operations, as of June 30, 2021, Water Ways Technologies has access to the following sources of financing: credit lines with a major Israeli bank totaling \$830, factoring credit line totaling \$295 and access to supplier credit of 180 days with several key suppliers. In addition, Water Ways Technologies aims to manage potential credit risk in relation to customer receivables through use of letters of credit and trade insurance policies in an effort to reduce fluctuations in its liquidity position.

During February and March 2021, prior to their expiration, the Company raised an additional \$480 through the exercise of previously issued warrants.

On April 23, 2021, the Company gained access to additional credit line with a major Canadian bank totaling \$240.

On June 30, 2021, the Company completed the first tranche of its Offering and raised net proceeds of \$2,405.

Six month period ended June 30, 2020

During the six months period ended June 30, 2021, the Company's overall position of cash and cash equivalents increased by \$3,074.

Cash provided by operating activities during the six months period ended June 30, 2021 was \$172.

Cash provided by investing activities during the six months period ended June 30, 2021, was \$26 and it was primarily as a result of purchasing Property, Plant & Equipment and the release of short term deposits.

Cash provided by financing activities for the six months period ended June 30, 2021, was \$2,757. The increase is associated mainly to the Warrant exercise during the period and the private placement first tranche.

Water Ways Technologies Inc.

Management Discussion and Analysis

6. FINANCIAL INSTRUMENTS AND FINANCIAL RISK EXPOSURES

The Company's financial instruments consist of cash and cash equivalents, short term deposits, accounts receivables, other receivables, inventory, trade payables and other accounts payable. Unless otherwise noted, it is management's opinion that Water Ways Technologies is (after appropriate provision has been made for collections problems of accounts receivable) not exposed to significant interest or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

6. **FINANCIAL INSTRUMENTS AND FINANCIAL RISK EXPOSURES (CONT.)**

Management understands that Water Ways Technologies is exposed to financial risk arising from fluctuations in foreign exchange rates and the degree of volatility of these rates as its principal operations are located in Israel, and the Company's functional and presentation currency is the USD. Water Ways Technologies does not use hedges or other derivative instruments to reduce its exposure to foreign currency risk.

Water Ways Technologies is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management process. The overall objectives of the Board of Directors are to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility.

The type of risk exposure and the way in which such exposure is managed is as follows:

a) Credit risk

Water Ways Technologies has no significant concentration of credit risk arising from operations. Management believes that the credit risk concentration with respect to financial instruments is remote. The Company's sales are guaranteed either by irrevocable letters of credit or a foreign trade risk insurance policy covering the majority of the Company's sales. For each project that Water Ways Technologies undertakes, the practice is to secure an irrevocable letter of credit confirmed by a reputable bank with respect to the major customer accounts.

b) Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities as they come due. As of June 30, 2021, Water Ways Technologies had working capital of \$3,552 thousand compared with \$12 thousand for the year ending December 31, 2020. Management believes that the Company's exposure to liquidity risk is not material.

c) Market Risk

i) Interest rate risk

Water Ways Technologies has cash and short-term investments. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. Water Ways Technologies periodically monitors the investments it makes and is satisfied with the competitive interest rates it has through its banking relationships.

ii) Foreign currency risk

Water Ways Technologies is exposed to foreign exchange risk as its research operations are conducted primarily in Israel, however the majority of income is in US Dollars; the risk exposure is only to related expenses in NIS.

d) Fair Values

The carrying values of short term deposits, trade accounts receivable other receivables, inventory, trade accounts payable and other accounts payables approximate their fair values due to their short terms to maturity. The cash, short term investments and investments are valued using quoted market prices in active markets.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

7. **COMMITMENTS**

Liens and security arrangements

- a) Three of the Company's motor vehicles are pledged as security to local banks and financial institutions who granted the loans for the purchase of the motor vehicles. The total amount of the loans secured by the Company's motor vehicles is \$18. The pledges are in place until the loans have been repaid.
- b) Irri-Al-Tal recorded a floating charge over all of Irri-Al-Tal's assets in favor of an Israeli bank.

Leases

The Company leases its office facilities and warehouses under operating leases. Total rent expense under these operating leases was \$28 and \$20 for the three months period ended March 31, 2021, and 2020, respectively.

8. **OTHER INFORMATION**

Water Ways Technologies - Balance at the date hereof:

9. **RISKS AND UNCERTAINTIES**

The Company's business faces numerous financial and market risks, including those described below, as well as general economic and business risks (See Schedule "A").

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

Managements Responsibility for Financial Statements

Management has established processes to provide it with sufficient knowledge to support representations that it has exercised reasonable diligence to ensure that (i) the consolidated financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the consolidated financial statements, and (ii) the consolidated financial statements fairly present in all material respects the financial position, results of operations and cash flows of the Company, as of the date of and for the periods presented.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 – Certification of Disclosure in Issuers’ Annual and Interim Filings (“**NI 52-109**”), the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures (“**DC&P**”) and internal control over financial reporting (“**ICFR**”), as defined in NI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of:

- 1) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- 2) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with the issuer’s GAAP (IFRS).

The issuer’s certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in the certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost-effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Additional Information

Additional information relating to the Company, the Company’s quarterly and annual consolidated financial statements and other disclosure documents, are available on the System for Electronic Document Analysis and Retrieval (SEDAR) website at www.sedar.com.

Management Discussion and Analysis
For the Three and Six Months Period Ended June 30, 2021

SCHEDULE "A"

RISK FACTORS

The following is not an all-inclusive listing of risks, although the Company believes these are the more material risks that WWT faces. Risks and uncertainties that are either not known to WWT or that WWT considers at this time to be immaterial or insignificant could also be detrimental to the ongoing affairs of WWT. If any of these risks occur, WWT's business, financial position, results of operations or cash flows could be materially adversely affected.

NEW BUSINESS AREAS, GEOGRAPHIC MARKETS, AND WWT'S ABILITY TO IMPLEMENT ITS BUSINESS STRATEGY IN THOSE MARKETS

WWT's growth strategy is dependent upon expanding its product and service offerings into new business areas or new geographic markets. There can be no assurance that these new business areas and geographic markets will generate the anticipated clients and revenue. In addition, any expansion into new business areas or geographic markets could expose WWT to new risks, including compliance with applicable laws and regulations, changes in the regulatory or legal environment; different customer preferences or habits; adverse exchange rate fluctuations; adverse tax consequences; differing technology standards or end-user requirements and capabilities; difficulties staffing and managing foreign operations; infringement of third-party intellectual property rights; the cost of localizing software (including translations) or otherwise adapting its products and services for new markets; difficulties collecting accounts receivable; or difficulties associated with repatriating cash generated or held abroad in a tax-efficient manner.

WWT expects that almost all of its future revenue will be derived from its business operations outside of Israel. Execution of this business strategy is subject to a variety of risks, including operating and technical problems, regulatory uncertainties and possible delays. Operating in different international regions, could mean that revenues earned from customers may decrease in the future for a variety of reasons, including increased competition and new entrants into geographic markets in which WWT operates or intends to operate. Depending on the countries involved, any or all of the foregoing factors could have an adverse effect on WWT's business, financial condition and results of operations.

The growth and expansion of WWT's business is heavily dependent upon the successful implementation of WWT's business strategy. There can be no assurance that the Company will be successful in the implementation of its business strategy. These factors could cause WWT's expansion into new business areas or geographic markets to be unsuccessful or less profitable than its existing markets or could cause WWT's operating costs to increase unexpectedly or its sales to decrease, any of which could have an adverse effect on the Company's prospects, business, financial condition or results of operations. In addition, there can be no assurance that laws or administrative practices relating to taxation, foreign exchange or other matters in countries within which WWT intends to operate will not change. Any such change could have an adverse effect on the Company's business, financial condition and results of operations.

DEPENDENCE ON KEY PERSONNEL AND EMPLOYEES

The success of WWT is dependent on the services and performance of key executives, including the directors of the Company and a small number of highly skilled and experienced executives and personnel. WWT strongly depends on the business and technical expertise of its management and key personnel. Due to the size of the Company, the loss of any of these individuals or WWT's inability to attract and retain additional highly skilled employees may adversely affect its business and future operations.

WWT's key people, including, Ohad Haber, Dor Sneh, Amir Eylon, and Tomer Bachar make significant contributions to the Company and its continued success will be dependent upon the retention of these directors, executive officers and employees, as well as the services provided by the Company's sales and administrative staff, and a number of other key managerial, marketing, planning, financial, technical and operations personnel. The loss of such key personnel could have an adverse effect on WWT's business. In addition, the Company's ability to grow its business is dependent, to a large degree, on WWT's ability to retain such employees and there can be no assurance that WWT will be able to engage the services of such personnel or retain its current personnel given the high competition for highly skilled technical, research and development, management and other employees.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

CREDIT RISK

Credit risk is the risk of financial loss to WWT if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from WWT's receivables from customers. The Company's exposure to credit risk is influenced by the individual characteristics of each customer. Although WWT establishes an allowance for doubtful accounts that represents its estimate of potential credit losses in respect of accounts receivables and historically has not experienced any significant losses related to individual customers or groups of customers in any particular geographical area, there is no assurance that the allowance for doubtful accounts will be sufficient to cover credit losses in the future and future credit losses could have an adverse effect on WWT's prospects, business, financial condition and results of operations. Furthermore, since WWT's principal office is located in the State of Israel, there is additional credit risk associated with an Israeli Company doing business in foreign jurisdictions, which in some cases have volatile social, political and economic environments.

INABILITY TO MANAGE RAPID GROWTH AND RETAIN ITS CUSTOMERS

WWT's business plan envisages further growth in its revenue and customer base. The Company's limited operating history has not to date managed such growth. WWT will likely need to expand and upgrade the reliability and scalability of its transaction processing systems, network infrastructure and other aspects of WWT's technology. WWT may not be able to expand and upgrade its personnel, technology systems and infrastructure to accommodate increases in the Company's business activity in a timely manner, which could lead to operational breakdowns and delays, loss of customers, a reduction in the growth of WWT's customer base, increased operating expenses, financial losses, increased litigation or customer claim. In addition, due to WWT's planned rapid growth, the Company will need to continue to attract, hire and retain highly skilled and motivated officers and employees. WWT may not be able to attract or retain the officers and employees necessary to manage this growth effectively.

FOREIGN OPERATIONS

WWT relies on international sales of its products in Latin America, Asia, Africa and Middle East and WWT expects to do so to a greater extent in the future as it continues to expand its business. There are a number of risks inherent in WWT's international activities, including: unexpected changes in governmental policies in Israel or project locations concerning the import and export of goods; services and technology and other regulatory requirements; tariffs and other trade barriers; costs and risks of localizing products for foreign languages; longer accounts receivable payment cycles; limits on repatriation of earnings; the burdens of complying with a wide variety of foreign laws; and difficulties supervising and managing local personnel. As such, WWT's operations may be adversely affected by changes in foreign government policies and legislation or social instability and other factors which are not within the control of the Company, including, but not limited to, changes in regulatory requirements, economic sanctions, risk of terrorist activities, revolution, border disputes, implementation of tariffs and other trade barriers and protectionist practices, volatility of financial markets, labour disputes and other risks arising out of foreign governmental sovereignty over the areas in which WWT's operations are conducted. Laws and policies of Israel and such foreign jurisdictions affecting foreign trade, taxation and investment may have an adverse effect on the Company's operations.

If WWT's operations are disrupted and/or the economic integrity of its contracts is threatened for unexpected reasons, its business may be harmed. In the event of a dispute arising in connection with the Company's operations in a foreign jurisdiction where WWT does conduct or will conduct its business, WWT may be subject to the exclusive jurisdiction of foreign courts or may not be successful in subjecting foreign persons to the jurisdictions of the courts of Canada or enforcing Canadian judgments in such other jurisdictions. WWT may also be hindered or prevented from enforcing its rights with respect to a governmental instrumentality because of the doctrine of sovereign immunity. Accordingly, WWT's activities in foreign jurisdictions could be substantially affected by factors beyond their control, any of which could have an adverse effect on the Company. WWT believes that its management is sufficiently experienced to reduce these risks.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

LIQUIDITY RISK

Liquidity risk is the risk that WWT will not be able to meet its financial obligations as they fall due. WWT's approach to managing liquidity is to ensure it will always have sufficient liquidity to meet its liabilities when due, under both normal and distressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. There is no assurance that the Company's approach to managing liquidity will prove successful and should the Company be unable to meet its liabilities when due it could have an adverse effect on WWT's prospects, business, financial condition and results of operations.

COMPETITION

WWT operates in competitive environments that include the proprietary knowhow and ability to tailor the unique solution to specific customer needs, technological strength, speed and flexibility in responding to design or schedule changes, price, quality, delivery, cost management and financial strength. WWT's earnings could decline if its competitors or customers can provide comparable speed and quality at a lower cost, or if WWT fails to adequately invest in the range and quality of services and products its customers require. Some of the Company's competitors are larger and have greater financial and organizational resources, geographic breadth and range of services, customer bases and brand recognition than the Company. As a result, WWT's competitors may respond more quickly to technological changes or customer needs, consume lower fixed and variable unit costs, and obtain better terms for financing growth. If WWT fails to compete in any of these areas, it may lose market share and its business could be seriously harmed. There can be no assurance that WWT will not experience increased competition or that WWT will be able to maintain its profitability if its competitive environment changes.

WWT's commercial success depends upon its ability to develop new or provide its customers improved services, using its proprietary knowhow and ability to tailor the unique solution to specific customer needs. In addition, its success depends upon its ability to offer its customers advanced technologies and products.

WWT relies on, among other things, trade secrets, confidentiality procedures and contractual provisions to protect its proprietary rights. While WWT enters into confidentiality and non-disclosure agreements with its employees, consultants, customers and potential customers to attempt to limit access to and distribution of proprietary and confidential information, it is possible that:

- some or all of its confidentiality and non-disclosure agreements will not be honoured;
- third parties will independently develop equivalent technology or misappropriate the Company's technology or designs;
- disputes will arise with WWT's strategic partners, customers or others concerning the ownership of intellectual property;
- unauthorized disclosure or use of WWT's intellectual property, including source code, know-how or trade secrets will occur; or
- contractual provisions may not be enforceable.

The Company's competitors range from small venture backed enterprises with limited resources to multi-national technology companies with larger customer bases, more established name recognition and substantially greater financial, marketing, technological and personnel resources than WWT will have. These larger and better capitalized competitors may have access to capital in greater amounts and at lower costs than WWT will have, and thus, may be better able to respond to changes in the irrigation market, to compete for skilled professionals, to finance acquisitions, to fund internal growth and to compete for market share generally. Access to capital is critical to grow the Company's business, particularly in the early stages. Access to capital determines the degree to which WWT can expand its operations. Thus, if WWT is unable to maintain or increase the Company's capital on competitive terms, WWT could be at a significant competitive disadvantage, and WWT's ability to maintain or increase its revenue and earnings could be materially impaired. Also, new or existing competitors in WWT's markets could make it difficult for WWT to grow its current market share in desirable markets. In addition, the Company's competitors could offer their products and services at lower prices, and WWT may be required to reduce the Company's fees significantly to remain competitive. A fee reduction without a commensurate reduction in expenses would decrease WWT's planned profitability. WWT may not be able to compete effectively against these companies, particularly those with greater financial resources, and the Company's failure to do so could materially and adversely affect its business, financial condition and results of operations and cash flows. WWT may in the future face increased competition, resulting in narrowing bid/offer spreads which could materially adversely affect the Company's

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

business, financial condition and results of operations and cash flows.

LACK OF REVENUE GROWTH

The cost structure of WWT is largely fixed. WWT bases its cost structure on expected levels of demand for the Company's products as well as its fixed operating infrastructure. If WWT fails to grow the demand for its products and services, it may not be able to adjust its cost structure on a timely basis and its profitability may be materially adversely affected.

LIMITED NUMBER OF CUSTOMERS

WWT's revenues in the projects business unit are currently generated primarily from a limited number of customers, however WWT is not substantially dependent on any one customer or contract. The Company's customers in the unit are, or are expected to be, generally small and medium-sized agricultural operators located in emerging markets and are subject to an unpredictable business and operating environment. This means that, if several of WWT's customers cease doing business with WWT, or for other reasons significantly reduce the scope of their projects with the Company, its business, financial condition and performance could suffer.

In addition, WWT's customers and distributors in its components and equipment sales unit are not expected to make long-term commitments to WWT regarding purchase volumes and purchases are typically made by one-time purchase orders. Furthermore, there can be no assurance that any of the Company's customers or distributors in this unit will not significantly reduce the amount of their purchases, default on, delay or dispute payment of, or seek to reject the Company's outstanding invoices, favour competitors or new entrants, or compete with WWT by expanding their private label product lines. If any of the foregoing developments were to arise, there could be an adverse effect on WWT's business, financial condition and results of operations.

DEFECTS IN PRODUCTS AND SERVICES

WWT's products and services are highly complex and sophisticated and may contain design defects or errors that are difficult to detect and correct. Defects found in the Company's new products or services could delay commercial release for an extended period of time. Errors or defects may be found in new products or services after launch and, even if discovered, WWT may not be able to successfully correct such errors or defects in a timely manner or at all. The occurrence of errors and failures in the Company's products or services could result in loss of or delay in end user acceptance of its products or services and may harm WWT's reputation. Correcting such errors and failures in its products or services could require significant expenditures by the Company, involving cost or time and effort of personnel which cannot be recovered from others (i.e. OEM, or insurance). The consequences of such errors, failures and claims could have an adverse effect on the Company's prospects, business, financial condition or results of operations. Furthermore, since the OEMs may be larger or better capitalized than WWT, and the Company may practically have limited recourse against the OEMs from which WWT procures the products and any potential claims may be difficult to prove or to enforce.

WWT MAY BE UNABLE TO RESPOND TO CUSTOMERS' DEMANDS

New products provided by WWT's competitors may render the Company's existing products less competitive. WWT's future success will depend, in part, on the Company's ability to respond to customers' demands for new products on a timely and cost-effective basis and to address the increasingly sophisticated requirements and varied needs of WWT's customers and prospective customers. WWT may not be successful in developing, introducing or marketing new products. In addition, the Company's new product enhancements may not achieve market acceptance. Any failure on WWT's part to anticipate or respond adequately to customer requirements or changing industry practices, or any significant delays in the development, introduction or availability of new products or product enhancements could have an adverse effect on the Company's business, financial condition and results of operations and cash flows.

OPERATIONAL AND FINANCIAL INFRASTRUCTURE

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

WWT is subject to growth-related risks, capacity constraints and pressure on its internal systems and controls, as well as control and monitoring of marketing activities of the Company's sales agents in other countries. The ability of WWT to manage growth effectively will require it to continue to implement and improve its operational and financial systems and to expand, train and manage its employee base. WWT intends to expand its employee base, and this expansion may require WWT to commit financial, operational and technical resources in advance of an increase in the size of the business, with no assurance that the volume of business will increase or that such initiatives to improve and upgrade its systems and infrastructure will be successful. The inability to deal with this growth or any failure in these initiatives could have an adverse effect on the Company's prospects, business, financial condition or results of operations.

UNCERTAIN ECONOMIC HEALTH OF THE WIDER ECONOMY

WWT's revenue streams are dependent on the overall macro-economic environment. Current and future conditions in the domestic and global economies remain uncertain. Accordingly, adverse developments in the macro-economic environment could substantially reduce the funds spent on the products and services offered by WWT and have an adverse effect on the Company's prospects, business, financial condition or results of operations.

Demand for WWT's products is influenced by general economic and consumer trends beyond the Company's control. There can be no assurance that WWT's business and corresponding financial performance will not be adversely affected by general economic or consumer trends. In particular, global economic conditions are still tight, and if such conditions continue, recur or worsen, there can be no assurance that they will not have an adverse effect on WWT's business, financial condition and results of operations.

Furthermore, such economic conditions may produce downward pressure on stock prices and have produced such pressure on the availability of credit from financial institutions for the Company. If these levels of market disruption and volatility continue, WWT might experience reductions in business activity, increased funding costs and funding pressures (as applicable), a decrease in the market price of its shares, a decrease in asset values, write-downs and impairment charges and lower profitability.

CURRENCY FLUCTUATIONS

WWT's functional currency is NIS but an increasing proportion of the Company's revenue may be earned and expenses may be incurred in other currencies, including the USD. The movement of any of these currencies against the NIS or USD could have an adverse effect on the Company's prospects, business, financial condition and results of operations. As WWT continues to expand its international operations, WWT becomes more exposed to the effects of fluctuations in currency exchange rates.

POTENTIAL POLITICAL, ECONOMIC AND MILITARY INSTABILITY IN MIDDLE EAST AND ISRAEL, WHERE IRRI-AL-TAL'S CORPORATE OFFICE ARE LOCATED

WWT's principal corporate offices and principal research and development facilities are located in Israel. Accordingly, political, economic and military conditions in and surrounding Israel may directly affect its business. Since the State of Israel was established in 1948, a number of armed conflicts have occurred between Israel and its neighbors. Terrorist attacks and hostilities within Israel; the hostilities between Israel and Hezbollah and between Israel and Hamas; the conflict between Hamas and Fatah; as well as tensions between Israel and Iran, have also heightened these risks, including extensive hostilities in November 2012 and from July to August 2014 along Israel's border with the Gaza Strip, which resulted in missiles being fired from the Gaza Strip into Israel. There can be no assurance that attacks launched from the Gaza Strip will not reach our facilities, which could result in a significant disruption of our business. In addition, there are significant ongoing hostilities in the Middle East, particularly in Syria and Iraq, which may impact Israel in the future. Any hostilities involving Israel, a significant increase in terrorism or the interruption or curtailment of trade between Israel and its present trading partners, or a significant downturn in the economic or financial condition of Israel, could materially adversely affect the Company's operations. Ongoing and revived hostilities or other Israeli political or economic factors could have an adverse effect on its business, operating results and financial condition.

It is unknown as to how the volatile climate currently hinders Israel's international trade relations and whether they still may limit the geographic markets where WWT can operate. Any resumption of hostilities involving Israel or threatening Israel, or the interruption or curtailment of trade between Israel and its present trading

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

partners, could have an adverse effect on the Company's operations albeit that there is no direct evidence of this having been the case over the past conflicts. Security and political instability in the Middle East and Israel in particular may harm the Company's business. A majority of the Company's staff, as well as its research and development facilities, are located in Israel. Accordingly, security and political conditions in the Middle East in general, and in Israel in particular, could directly affect WWT's business. Any armed conflicts or political instability in the region, including acts of terrorism or any other hostilities involving or threatening Israel could have a negative effect on business conditions and could make it more difficult for WWT to conduct its operations in Israel and/or increase its costs and adversely affect its financial results. Furthermore, some neighbouring countries, as well as certain companies and organizations continue to participate in a boycott of Israeli firms and others who do business with Israel or with Israeli companies. However, generally this is not the case with the major corporations in the industry that deal with Israel. Restrictive laws, policies or practices directed towards Israel or Israeli businesses could have an adverse impact on the expansion of WWT's business. These factors may also adversely affect the Company's ability to conduct business in its Project Financing Sub-Unit as any deterioration in international trade relations may affect the security of the letters of credit as WWT may have difficulty enforcing its rights under the letters of credit with its counterparties located in foreign jurisdictions.

WWT's operations could be disrupted by the absence for significant periods of one or more of its senior management, key employees or a significant number of other employees because of military service. A number of the Company's senior management and the majority of its male employees in Israel under the age of 45 are obliged to perform military reserve duty, which accumulates annually from several days to up to two months in special cases and circumstances. The length of such reserve duty depends, among other factors, on an individual's age and prior position in the military. In addition, if a military conflict occurs, these persons could be required to serve in the military for extended periods of time. Any disruption in the Company's operations as the result of military service by key personnel could harm its business.

REDUCTION OF PROJECT BACKLOG

WWT cannot guarantee that the dollar value estimated in its current project backlog will be realized or, if realized, will result in profits. Projects may remain in the Company's backlog for an extended period of time. In addition, project cancellations or scope adjustments may occur from time-to-time with respect to contracts reflected in WWT's backlog. Backlog reductions adversely affect the revenue and profit that WWT actually receives from contracts reflected in its backlog. Future project cancellations and scope adjustments could further reduce the dollar amount of the Company's backlog and the revenues and profits that WWT actually receives. Some of the of the Company's contracts for professional services with its clients are terminable by the clients on short notice. If a reduction in WWT's backlog occurs, WWT could incur costs resulting from reductions in staff that would have the effect of reducing its profits.

RELIANCE ON INDEPENDENT MANUFACTURING COMPANIES FOR SUPPLY OF PRODUCTS

Loss of WWT's relationships with OEMs on which it relies for the manufacture of its products could have an adverse effect on the Company's operations. As a result of WWT's key manufacturers, funding, supply chain, technical, and/or other difficulties experienced by the OEMs could adversely affect WWT's ability to deliver its products to its customers on time. Any significant delivery delays could negatively impact the Company's future revenue and may have an adverse effect on the business, financial position or results of operations of WWT. In addition, it is possible that the OEMs may face high demand for their products and not be able to supply WWT with the products that it needs, and/or when it needs them. Trade barriers, such as tariffs imposed by governments on import, also have the potential to disrupt the Company's supply chain, necessitating WWT to find other suppliers on short notice. Such tariffs could also impose additional costs on the Company, negatively impacting its profitability.

WWT's exclusive sourcing from the OEMs also exposes it to risks, including:

- political instability, civil unrest and economic instability;
- currency fluctuations;
- limitations on the repatriation of capital;
- greater difficulty enforcing intellectual property rights and weaker laws protecting such rights;
- natural disasters and greater difficulty and expense in recovering from them;

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

- changes in governmental policies;
- changes in international labour costs, labour strikes disruptions or lock-outs;
- difficulties in moving materials and products from one country to another, including port congestion, strikes and other transportation delays and interruptions;
- difficulties in controlling the quality of raw materials and components used to manufacture WWT' products, which may lead to public health and other concerns regarding its products; and
- potential challenges to the Company's transfer pricing determinations and other aspects of its cross-border transactions which may impact income tax expense.

Due to WWT's reliance on the sourcing of materials from Israeli companies, its business, financial condition and performance could be significantly and materially harmed if any of the risks described above were to occur. As most of OEMs that WWT deals with are based in Israel, they may be subject to additional risks that Israeli-based companies are subject to generally.

CRIME AND BUSINESS CORRUPTION RISK

WWT conducts business in regions which have experienced high levels of business corruption and other criminal activity. WWT and its personnel are required to comply with applicable anti-bribery laws, including the Canadian Corruption of Foreign Public Officials Act, as well as local laws in all areas in which WWT does business. These, among other things, include laws in respect of the monitoring of financial transactions and provide a framework for the prevention and prosecution of corruption offences, including various restrictions and safeguards. However, there can be no guarantee that these laws will be effective in identifying and preventing money laundering and corruption. The failure of some of the governments where WWT does business to fight corruption or the perceived risk of corruption could have an adverse effect on the local economies. Any allegations of corruption or evidence of money laundering in those countries could adversely affect ability of those countries to attract foreign investment and thus have an adverse effect on its economy which in turn could have an adverse effect on the Company's business, results of operations, financial condition and prospects. Moreover, findings against WWT, the directors, the officers or the employees of the Company, or their involvement in corruption or other illegal activity could result in criminal or civil penalties, including substantial monetary fines, against WWT, the directors, the officers or the employees of the Company. Any government investigations or other allegations against the Company, the directors, the officers or the employees of WWT, or finding of involvement in corruption or other illegal activity by such persons, could significantly damage the Company's reputation and its ability to do business and could have an adverse effect on its financial condition and results of operations.

ACCESS TO VARIOUS PARTS, COMPONENTS, AND RAW MATERIALS

WWT obtains its raw materials, component parts, and finished products from multiple vendors. WWT requires access to various parts, components, and raw materials at competitive prices to assemble products within its component business segment. Changes in the availability and price of these parts, components, and raw materials, which have changed significantly and rapidly at times and are affected by factors like demand and freight costs, can significantly increase the costs of production. Due to price competition in the market for irrigation equipment and certain infrastructure products, WWT may not be able to recoup increases in these costs through price increases for its products, which would result in reduced profitability. Whether increased operating costs can be passed through to the customer depends on several factors, including farm income and the price of competing products. Further, WWT relies on a limited number of suppliers for certain raw materials, parts and components in the manufacturing process. Disruptions or delays in supply or significant price increases from these suppliers could adversely affect the Company's operations and profitability. Such disruptions, terminations or cost increases could result in cost inefficiencies, delayed sales or reduced sales.

WWT's reliance on third parties (including the OEMs and external consultants) for research and development may have an adverse effect on the Company's business, financial position and revenue. WWT relies on the OEMs and third-party consultants for the innovation and development of its products, including Precise Irrigation System. It is possible for these parties to terminate the relationship with WWT or supply a competitor with the same products it delivers to the Company, this may cause WWT to lose its competitive place in the market. The reliance on the OEMs for the supply and research and development of products poses a risk that may negatively impact the profitability and financial sustainability of the Company.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

RAPID TECHNOLOGY CHANGE

The precise irrigation segment of the market that is targeted by WWT is characterized by rapid technological change, evolving industry standards, frequent new product introductions and short product life cycles. To keep pace with the technological developments, achieve product acceptance and remain relevant to users, WWT will need to continue developing new and upgraded functionality of its products and services and adapt to new business environments and competing technologies and products developed by its competitors. The process of developing new technology is complex and uncertain. To the extent WWT is not able to adapt to new technologies and/or standards, experiences delays in implementing adaptive measures or fails to accurately predict emerging technological trends and the changing needs of end-users, WWT may lose clients and/or fail to secure new clients. WWT has developed and is continuing to develop a number of products and services incorporating advanced technologies and it will pursue those products and services that it expects to have the best chance for success based on the Company's expectations of future market demand. The development and application of new technologies involve time, substantial costs and risks. There can be no certainty that WWT will be able to develop new products, services and technologies to keep up-to-date with developments and, in particular, to launch such products, services or technologies in a timely manner or at all. There can be no certainty that such products will be popular with end-users or that such products or new technologies will be reliable, robust and not susceptible to failure. Any of these factors could have an adverse effect on the Company's prospects, business, financial condition or results of operations.

CHANGES IN TAX LAWS

Changes in taxation rates or law, or misinterpretation of the law or any failure to manage tax risks adequately could result in increased charges, financial loss, including penalties and reputational damage, which could have an adverse effect on WWT's prospects, business, financial condition and results of operations.

The policy of WWT is to manage and operate its business in a way that is intended to ensure that it is resident for tax purposes solely in the State of Israel and that it has no taxable permanent establishments or other taxable presence in any other jurisdiction. However, if WWT is found to be tax resident elsewhere by establishing offices in those jurisdictions, whether on the basis of existing law or the current practice of any tax authority or by reason of a change in law or practice, this may have an adverse effect on the overall amount of tax payable by the Company.

RISKS RELATED TO INTELLECTUAL PROPERTY PROTECTION

Proprietary trade secrets and unpatented know-how are very important to WWT's business. Much of the technology used in the markets in which it competes is unprotected by patents, and the commercial success of WWT will depend primarily on its ability to obtain and maintain trade secret protection and confidentiality for the Company's products and methods. To compete in these markets, WWT relies primarily on a combination of trade secret protection, non-disclosure agreements and unregistered intellectual property to establish and protect proprietary intellectual property rights. WWT relies on trade secrets to protect certain aspects of its technology, especially where management does not believe that patent protection is appropriate or obtainable. However, trade secrets are difficult to protect. The Company's employees, consultants, contractors, outside scientific collaborators and other advisors may unintentionally or willfully disclose confidential information to competitors, and confidentiality agreements and non-disclosure agreements may not provide an adequate remedy in the event of unauthorized disclosure of confidential or proprietary information. Enforcing a claim that a third party illegally obtained and is using trade secrets is expensive and time consuming, and the outcome is unpredictable, particularly so in certain foreign jurisdictions. Moreover, competitors of WWT may independently develop equivalent knowledge, methods and know-how. Failure to obtain or maintain trade secret protection could adversely affect the Company's competitive business position. Where appropriate, WWT intends to rely on patented products and applications. Management will evaluate whether to seek patent protection for its products. The Company's ability to obtain patents is uncertain and the legal protection afforded by these patents is limited and may not adequately protect its rights or permit it to gain or keep any competitive advantage. It is also costly to apply for and maintain patents in multiple jurisdictions. In addition, the scope and enforceability of patent claims is highly uncertain due to the complex nature of the relevant legal, scientific and factual issues. Changes in either patent laws or interpretations of patent laws may diminish the value of WWT's intellectual property or narrow the scope of

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

the Company's patent protection. Even if patents are issued relating to the Company's products and processes, competitors may challenge the validity of those patents. Patents also will not protect WWT's products and processes if competitors devise ways of making products without infringing such patents.

ENVIRONMENTAL RISKS AND HAZARDS

WWT's operations are subject to various environmental laws which regulate matters such as health, safety, treatment of waste and land use. Failure to comply with applicable laws, regulations, and licensing requirements may result in enforcement actions. Penalties could include suspension or revocation of necessary licenses or permits, civil liability, or the imposition of fines. The cost of compliance, remediation, or liability could have an adverse effect on future operating results. Furthermore, the operational or financial impact of new or amended laws or regulations cannot be predicted and could have an adverse effect on the Company's financial condition and operating results.

RELIANCE ON COLLABORATIVE PARTNERS

WWT relies on Master Dealer Relationships, Dealer Relationships and other collaborative arrangements to provide services and to develop and commercialize some of its products or services in the future. There can be no assurance that WWT will be able to negotiate acceptable collaborative arrangements, that such collaborative arrangements will be successful or that WWT would not be required to relinquish certain material rights to its products or services. In addition, there can be no assurance that the Company's collaborative partners will not pursue alternative technologies or develop alternative products or services either on their own or in collaboration with others, including the Company's competitors. To the extent that WWT succeeds in entering into collaborative arrangements, it will be dependent on the efforts of third parties for the continued development of certain services or products.

Additionally, WWT employs agents and subcontractors as part of the delivery of the Company's services to its customers and as part of the development and commercialization of its products. The ultimate liability for the performance of the agents or subcontractors lies with WWT. Further, the Company's business model is based on the distribution of its products and services by third parties. If these third parties are not successful in distributing WWT's products and services it could have an adverse effect on the Company's prospects, business, financial condition or results of operations.

ADDITIONAL RISKS RELATING TO DOING BUSINESS INTERNATIONALLY

WWT is subject to risks generally associated with doing business in international markets. International markets will continue to be a focus for expansion and revenue growth. Several factors, including legal and regulatory compliance and weakened economic conditions in any of the international jurisdictions in which WWT does or will do business, or has or will have projects, could adversely affect such expansion and growth.

Additionally, WWT's entry into new international jurisdictions requires management attention and financial resources that would otherwise be spent on other parts of the business.

Some of the countries in which WWT sells or will sell products, or otherwise has or will have an international presence, are to some degree subject to political, economic, and/or social instability. International business operations expose WWT to risks and expenses inherent in operating or selling products in foreign jurisdictions, and developing and emerging markets in particular, where these risks may be heightened.

In addition to the risks mentioned elsewhere, these risks and expenses could have an adverse effect on WWT's business, results of operations or financial condition and include without limitation:

- adverse currency rate fluctuations;
- risks associated with complying with laws and regulations in the countries in which the Company's products are sold, and requirements to apply for and obtain licenses, permits or other approvals and the delays associated with obtaining such licenses, permits or other approvals;
- multiple, changing and often inconsistent enforcement of laws, rules and regulations;
- risks associated with reliance on international agents and representatives, including the possible failure of such agents and representatives to appropriately understand, represent and effectively market WWT's products;

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

- the imposition of additional foreign governmental controls or regulations, new or enhanced trade restrictions or non-tariff barriers to trade, or restrictions on the activities of foreign agents, representatives and distributors;
- increases in taxes, tariffs, customs and duties, or costs associated with compliance with import and export licensing and other compliance requirements;
- the imposition of restrictions on trade, currency conversion or the transfer of funds or limitations on the Company's ability to repatriate non-Canadian and/or non-Israeli earnings in a tax effective manner;
- the imposition of Canadian, United States, Israeli and/or other international sanctions against a country, Company, person or entity with whom WWT does business that would restricts or prohibits the Company's continued business with the sanctioned country, Company, person or entity;
- downward pricing pressure on our products in the Company's international markets, due to competitive factors or otherwise;
- laws and business practices favouring local companies;
- political, social or economic unrest or instability, including without limitation military conflicts and acts of terrorism, military repression, war or civil war, social and labour unrest, organized crime, hostage-taking and violent crime;
- expropriation and nationalization and/or renegotiation or nullification of necessary licenses, approvals, permits and contracts;
- greater risk on credit terms, longer payment cycles and difficulties in enforcing agreements and collecting receivables through certain foreign legal systems;
- difficulties in enforcing or defending intellectual property rights; and
- the effect of disruptions caused by severe weather, natural disasters, outbreak of disease or other events that make travel to a particular region less attractive or more difficult.

Governments in certain foreign jurisdictions intervene in their economies, sometimes frequently, and occasionally make significant changes in policies and regulations. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on doing business, price controls, export controls, currency remittance, importation of product and supplies, income and other taxes, royalties, the repatriation of profits, expropriation of property, foreign investment, maintenance of concessions, licenses, approvals and permits, environmental matters, land use, land claims of local people, water use and workplace safety. Furthermore, some of the Company's operations and sales are conducted in parts of the world that experience illegal sales practices or corruption or are operated under legal systems susceptible to undue influences to some degree. Although WWT has policies and procedures in place that are designed to promote legal and regulatory compliance, the employees, business partners and consultants of WWT could take actions that violate applicable anti-corruption laws or regulations. Violations of these laws, or allegations of such violations, could result in loss, reduction or expropriation and/or have an adverse effect on the Company's business, results of operations or financial condition.

The Company's international efforts may not produce desired levels of sales. Furthermore, WWT's experience with selling products in its current international markets may not be relevant or may not necessarily translate into favourable results if it sells in other international markets. If and when WWT enters into new markets in the future, it may experience different competitive conditions, less familiarity by customers with the Company's brand and/or different customer requirements. As a result, WWT may be less successful than expected in expanding sales in its current and targeted international markets. Sales into new international markets may take longer to ramp up and reach expected sales and profit levels, or may never do so, thereby affecting WWT's overall growth and profitability. To build brand awareness in these new markets, WWT may need to make greater investments in legal compliance, advertising and promotional activity than originally planned, which could negatively impact the expected profitability of sales in those markets. These or one or more of the other factors listed above may harm the Company's business, results of operations or financial condition. Any material decrease in our international sales or profitability could also adversely impact the overall business, results of operations or financial condition of WWT.

WWT will continue to monitor developments and policies in the emerging markets in which it will operate and assess the impact thereof to its operations, however such developments cannot be accurately predicted and could have an adverse effect on the Company's operations or profitability.

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

RISKS OF LITIGATION

Many aspects of WWT's business will involve risks that expose the Company to liability under applicable laws. These risks include, among others, disputes over trade terms with customers and other market participants, customer losses resulting from warranty claims for alleged product failure and alleged actionable customer service. Even if WWT prevails in any litigation or enforcement proceedings against the Company, WWT could incur significant legal expenses defending against the claims, even those without merit. Moreover, because even claims without merit can damage the Company's reputation or raise concerns among WWT's customers, WWT may feel compelled to settle claims at significant cost. The initiation of any claim, proceeding or investigation against the Company, or an adverse resolution of any such matter could have an adverse effect on the Company's reputation, business, financial condition and results of operations and cash flows.

USER DATA AND CYBERSECURITY RISKS

WWT may require the registration of its users prior to accessing its products or services or certain features of its products or services and it may be subject to increased legislation and regulations on the collection, storage, retention, transmission and use of user data that is collected. The Company's efforts to protect the personal information of its users may be unsuccessful due to the actions of third parties, software bugs or technical malfunctions, employee error or malfeasance, or other factors. In addition, third parties may attempt to fraudulently induce employees or users to disclose information in order to gain access to WWT's data or its users' data. If any of these events occur, users' information could be accessed or disclosed improperly. Any incidents involving the unauthorized access to or improper use of the information of users or incidents involving violation of the Company's terms of service or policies, could damage its reputation and WWT's brand and diminish its competitive position. In addition, the affected users or governmental authorities could initiate legal or regulatory action against WWT in connection with such incidents, which could cause WWT to incur significant expense and liability or result in orders or consent decrees forcing WWT to modify its business practices and remediate the effects of any such incidents of unauthorized access or use. Any of these events could have an adverse effect on the Company's prospects, business, financial condition or results of operations. The costs related to cyber security or other security threats or disruptions may not be fully insured or indemnified by other means. Occurrence of any of these events could adversely affect the Company's internal operations, the services it provides to customers, loss of competitive advantages derived from its research and development efforts, early obsolescence of its products and services, its future financial results, its reputation or its share price. WWT's current insurance policies may not protect WWT against all of such losses and liabilities. Any of these events, particularly if they result in a loss of confidence in the Company's products, could have an adverse effect on WWT's business, financial condition, results of operations and cash flows.

INTERNAL CONTROLS

Internal controls over financial reporting are procedures designed to provide reasonable assurance that transactions are properly authorized, recorded and reported and assets are safeguarded against unauthorized or improper use. A control system, no matter how well designed and operated, can provide only reasonable, and not absolute, assurance with respect to the reliability of financial reporting and financial statement preparation.

INSURANCE RISKS

WWT expects to maintain property and casualty insurance on certain of its assets. However, not all risks are covered by insurance and there is no assurance that insurance will be consistently available on an economically feasible basis or at all. WWT may also elect not to insure against certain liabilities due to high premium costs or for other reasons. Furthermore, although WWT expects to maintain insurance against such claims and in such amounts, it considers adequate, there is no assurance that such insurance policies will be sufficient to cover each and every claim or loss involving the Company. If WWT were to suffer an uninsured loss, its business, financial condition, and results of operations could face material adverse effects.

TRANSACTION RISK

Although WWT's growth strategy has not focused historically on acquisitions, WWT may in the future

Water Ways Technologies Inc.

Management Discussion and Analysis

For the Three and Six Months Period Ended June 30, 2021

selectively pursue acquisitions and new businesses. Any future acquisitions may result in significant transaction expenses, dilution of equity financings (including additional Common Share issuances to the targets for a part of the acquisition) and present new risks associated with entering additional markets or offering new products and integrating the acquired companies. Because acquisitions historically have not been a core part of the Company's growth strategy, WWT will not have significant experience in successfully completing acquisitions. WWT may not have sufficient management, financial and other resources to integrate companies WWT acquires or to successfully operate new businesses and WWT may be unable to profitably operate an expanded Company. Additionally, any new businesses that WWT may acquire, once integrated with the Company's existing operations, may not produce expected or intended results.

SUBSTANTIAL CAPITAL REQUIREMENTS

WWT has limited financial resources and may require substantial additional equity or debt financing in order to carry out its business objectives, including the continued development of new and upgraded functionality of the Company's products and services. There can be no assurance that debt or equity financing or cash generated by operations would be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, or that it would be on terms acceptable to the Company. Failure to obtain sufficient financing may result in the delay or indefinite postponement of development or production on any or all of the Company's products and services which could have an adverse effect on WWT's business, financial condition and results of operations.

INTER-COMPANY TRANSFERS OF FUNDS

Since WWT's operations are carried on through Irri-Al-Tal, it will be dependent on cash flows from Irri-Al-Tal. WWT is not currently subject to or aware of any limitations on the repatriation of funds from Irri-Al-Tal in Israel. WWT has developed a cash management system to provide for the flow of funds between the Company and Irri-Al-Tal. The system provides for:

- the structuring and documentation of fund transfers as loan arrangements, capital investments and/or management services arrangements between relevant entities;
 - internal approval process by the controller and the general manager at the subsidiary level, and for certain transactions exceeding the subsidiary's authority limits, by WWT's Chief Financial Officer; and
 - compliance with internal procedures and applicable local regulations.
- If any issues arising with the repatriation of funds, it may have an adverse effect on WWT.

The Company's business is subject to risks arising from a widespread outbreak of an illness or any other communicable disease, or any other public health crisis, such as the COVID-19 pandemic, which has impacted and could continue to impact the business.

In late 2019, a novel strain of COVID-19, also known as coronavirus, was reported in Wuhan, China. While initially the outbreak was largely concentrated in China, it has now spread to Israel and the United States, and infections have been reported globally. Many countries around the world, including in Israel, have significant governmental measures implemented to control the spread of the virus, including temporary closure of businesses, severe restrictions on travel and the movement of people, and other material limitations on the conduct of business. The nature of the Company's work in Israel, is such that the Company is considered an essential service industry, and therefore, are generally able to continue all of its operations in Israel with little disruption. The Company implemented remote working and work-place protocols for its employees in accordance with Israeli government requirements. Nevertheless, the COVID-19 pandemic has resulted in delays in receiving service orders from customers which has resulted in a decrease in revenues in recent periods. The extent to which COVID-19 continues to impact the Company's operations will depend on future developments, which are highly uncertain and cannot be predicted with confidence, including the duration and severity of the outbreak, and the actions that may be required to contain COVID-19 or treat its impact.
