Where the Company has control over an investee, it is classified as a subsidiary. The Company controls an investee if all three of the following elements are present: power over the investee, exposure to variable returns from the investee, and the ability of the investor to use its power to affect those variable returns. Control is reassessed whenever facts and circumstances indicate that there may be a change in any of these elements of control. *De-facto* control exists in situations where the Company has the practical ability to direct the relevant activities of the investee without holding the majority of the voting rights. In determining whether *de-facto* control exists the Company considers all relevant facts and circumstances, including:

- The size of the Company's voting rights relative to both the size and dispersion of other parties who hold voting rights.
- Substantive potential voting rights held by the Company and by other parties.
- Other contractual arrangements.
- Historic patterns in voting attendance.

The consolidated financial statements present the results of WWT and its subsidiaries as if they formed a single entity. Intercompany transactions and balances between group companies are therefore eliminated in full.

The Company considers expected volatility of the shares of comparable companies and its Common Shares in estimating its future stock price volatility. The risk-free interest rate for the expected life of the options was based on the yield available on Canadian government benchmark bonds with an approximate equivalent remaining term at the time of the grant. The expected life is based on the contractual term.
